-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims lack structural interconnections, are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. Note the format of the claims in the patents cited. The narrative form of the claims includes the phrase "layers may be contoured to adjust the rigidity they confer to.....", etc.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Latteri in view of Kline.

Art Unit: 2837

As the examiner best understands the invention, Latteri discloses the use of a floating blade plectrum comprising a plastic blade (column 4, lines 45-50) and rigid layers with an upper layer that is thicker than a lower layer. Latteri also discloses the use of non-slip grip layers (22, 26). Latteri does not disclose the use of a plate.

Kline discloses the use of a plectrum with plates (30,40) of thin rigid material.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the plectrum as disclosed by Latteri with the plate as disclosed by Kline in order to provide a durable plectrum with sturdy physical characteristics.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Latteri in view of Kline, Pereira, and Freeman.

Latteri and Kline do not disclose the use of cotton.

Pereira discloses the use of a pick made from cotton (column 3, lines 33-45) and adhesive.

Latteri, Kline, and Pereira do not disclose the use of a rubber material.

Freeman discloses the use of a plectrum that can be made from a rubber material or an aluminum material(column 8, lines 55-65; column 5, lines 30-35)).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the plectrum as disclosed by Latteri with the plate as disclosed by Kline, the cotton as disclosed by Pereira, and the rubber made from

Freeman in order to provide a durable plectrum with sturdy characteristics that provides a degree of flexibility.
